

COORDINATING DRAFT

FOREWORD

The Washington State Military Department sincerely appreciates the cooperation and support from those agencies, departments, and local jurisdictions that have contributed to the development and ultimate publication of the 1999 *Washington State Recovery Plan*. Coordination of the Plan represents a committed and concerted effort by state agencies and local jurisdictions to emergency management

The Plan provides a one-source document for Recovery. The Plan supports the *Federal Response Plan*. It should be appended to Emergency Support Function 21, Recovery and Restoration, of the *Comprehensive Emergency Management Plan*.

The *Washington State Recovery Plan* is one of the many efforts to be better prepared for emergencies or disasters. It moves the state one step closer to being able to minimize the impacts of emergencies and disasters on people, property, the economy, and the environment of Washington State.
